EDUCATION

Pragati Engineering College – 8.5 CGPA

Bachelor of Technology in Computer Science and Engineering

Jawahar Navodaya Vidyalaya (CBSE) – 80.6 %

Mathematics, Biology, Physics, and Chemistry

Surampalem, India

Aug 2022 – May 2026

Yanam, India

July 2015 – June 2022

SKILLS

Technical Skills	JavaScript, TypeScript, Python, C, HTML, CSS, React.js, Next.js, Node.js, Express.js
Blockchain	Bitcoin White Paper, Keypair Generation, Solana Web3.js, Crypto Wallets & Wallet Adapters
Developer Tools	Git/Github, Docker, NGINX, Vim, OpenAPI SPEC
Cloud/DB'S	CI/CD, PostgreSQL, Prisma ORM, MongoDB, Mongoose, AWS, Cloudflare Workers
Soft Skills	Leadership, Teamwork, Great Communication and Presentation Skills

EXPERIENCE

Frontend Engineer Intern

June 2025 – August 2025

ThinkAct AI [🔗](#)

Remote

- Developed responsive frontend interfaces for aviation management software serving US-based airports using React.js
- Built automated document verification portal for aviation compliance, streamlining document processing workflows
- Optimized application performance through code splitting, reducing load times by 40%

Product Engineer & Research Intern

August 2025 – Present

Yantrova [🔗](#)

Remote

- Developing React Native mobile application for smart parking solution targeting Indian metropolitan areas
- Conducting market research and analyzing technical requirements for smart parking mobile application
- Evaluating competitor strategies and identifying user needs for parking optimization solutions

PROJECTS

SnapWeb - Social Photo Sharing Platform | *Next.js, TailwindCSS, Prisma* ([Live Demo](#))

March 2024

- Built photo-sharing platform enabling users to upload, explore, like, and save images
- Designed responsive masonry gallery and onboarded 50+ users with positive UI/UX feedback
- Utilized Prisma with PostgreSQL for efficient database management

Quantum - Web3 Solana Wallet | *React.js, Solana Web3.js, Blockchain* ([Live](#))

Feb 2025

- Built decentralized wallet enabling secure cryptocurrency transactions on Solana blockchain
- Implemented BIP39 mnemonic generation and cryptographic keypair creation using Solana Web3.js API
- Researched Ethereum and Bitcoin wallet architectures to understand multi-chain development and expand technical knowledge

Wallet & Transaction App | *Next.js, Turborepo, NextAuth, Webhooks, Docker* ([Link](#))

Aug 2024

- Developed digital payment platform using Next.js and Turborepo with modular architecture
- Implemented real-time webhooks and NextAuth authentication with enterprise security
- Ensured 100% payment integrity with atomic transactions and automatic rollback mechanisms

ACHIEVEMENTS & CERTIFICATIONS

- ♦ **Google Developer Groups Lead (2024-25):** Selected among top 500 students nationwide, organizing technical workshops and developer community events reaching 200+ participants
- ♦ Certified in **"Problem Solving Through Programming In C"** from NPTEL ([View](#))
- ♦ **"JavaScript (Basic)"** certification from Hackerrank ([View](#))
- ♦ **"React (Basic)"** certification from Hackerrank ([View](#))
